

Special issue call for papers from Business Systems Research Journal: Novel solutions or novel approaches in Operational Research

Guest Editors – *prof.dr.sc. Ksenija Dumičić (University of Zagreb) & prof.dr.sc. Lidija Zadnik Stirn, prof.dr.dr.sc. Janez Žerovnik (University of Ljubljana)*

A special issue of the Business Systems Research Journal with **extended versions of selected papers from SOR'15 (The 13th International Symposium on Operations Research in Slovenia)** will be **published** under the journal's publishing standards.

Business Systems Journal (**BSR**) is an **international scientific journal** focused on improving competitiveness of business through the **modelling approach** and its applications. BSR examines a wide variety of business and economics decisions, processes and activities within the actual business setting, but within the systems and modelling approach framework. The main goal of the journal is **to keep a record of the state-of-the-art research** and promote the research work in these fast moving areas.

The deadline for submission is 30/01/16. The special issue is scheduled to be published in September, 2016.

If papers have already been presented at **SOR'15**, the authors should change the title, the abstract and at least 30% of the paper text, so that the paper can be treated as a completely new paper.

Journal website: <http://www.bsrjournal.org>

Online submission system is available at the web address: <http://www.editorialmanager.com/bsr>

Submissions to the Business Systems Research Journal could be also made directly to the editors by email:

bsreditors@outlook.com

The initial submission will be reviewed by the Guest Editors and, if deemed suitable, then placed for double-blind review with experts in the field.
